

# Custom-made, Precision-fabricated Carts, Trucks, Racks, Skids, and Pallets

**RACKS**

**TRUCKS**

**PALLETS/SKIDS**

**CARTS**

The **W.F. Gammeter Division** of Everhard Products, Inc. is the leading supplier of calender and service shells to the tire and rubber industry. We also specialize in precision-fabricated steel carts, trucks, racks, and other equipment used in conjunction with Gammeter shells.

Everhard Products has the engineering capabilities to design and build one of a kind prototypes. In addition, we have the purchasing capabilities and the plant facilities (more than 100,000 square feet) to build production runs of almost any quantity.

We manufacture top-quality products using fixturing and job-directed tooling to ensure consistent, accurate production output. For high strength and durability, we use continuous welds on prime metals of the proper gauge, never any shortcuts. When paint is required, we provide a primed, durable polyurethane finish.

Everhard Products can ship your requirements at competitive prices. You can receive a quote promptly based on drawings, prints and specifications.
