

Circular Knife Heaters

Constant temperature insulated circular knife heaters applicable whenever a warm or hot knife is required for cutting or trimming, as in the rubber working industries.

FEATURES

- A circular heating cavity with a chamfered mouth holds the tool being heated.
- High-efficiency, ceramic fiber, insulating blanket covers the entire outer surface of the heater, allowing higher heater temperature and protection from burns.
- Lead wires extend six inches from the end on the attaching pipe to facilitate the electrical connection to a junction box or mounting arrangement.
- Model MH26610 has a U-shaped channel attached to the full length of the heater's outer diameter providing a second heating cavity. Constant temperature insulated circular knife heaters applicable whenever a warm or hot knife is required for cutting or trimming, as in the rubber working industries.

MH26610, shown with optional perforated guard, includes the additional heating cavity.
