

ERGONOMIC HANDLE OPTIONS

HAND ROLLERS AND STITCHERS FOR THE TIRE AND RUBBER WORKING INDUSTRIES

Injury caused by repetitive motion in manufacturing seems to be on every Safety Engineer's mind today. In an effort to make our rollers and stitchers more comfortable and user friendly, we offer many of our tools with optional Soft Grip Plastic Handles and Offset Forks. The Soft Grip Plastic Handle provides a semi-soft, easy-to-grip surface, improving comfort and control. The Offset Forks encourage natural hand and wrist positions, especially important when performing repeated actions.

MR10883 Gooseneck Roller

Showing the single fork with a Soft Grip Plastic Handle.

MR06504 Porcupine Stitcher

Showing offset double forks, with a Soft Grip Plastic Handle.

MR01281 Smooth Stitcher

Showing the ergonomic double forks with a Soft Grip Plastic Handle.

MR02955 Corrugated Steel Roller

Features our 10" plastic handle with a cushion-grip sleeve.
