

Type RG Electric Heater

Everhard's Type RG electric heater is designed for heating rollers and stitcher tools used in the production of tires and other rubber products and plastic components. Many of the operations involved in the production of these items require heated tools. The Type RG heater is thermostatically controlled.

FEATURES:

- Standard leg construction is designed for side mounting. The heater can also be modified for upright operation.
- The heater includes a metal guard painted safety yellow (also available separately — **MH27250**) to prevent accidental contact with the heater during operation.
- Equipped with a three-wire grounded circuit with 15-amp, volt twist-lock plug. Other plugs are available and will be quoted on request.

SPECIFICATIONS	MH26700
Dimensions - Overall	7" (177.8 mm) x 5" (127.0 mm) x 6" 152.4 mm)
Dimensions - Oven	2" (50.8 mm) x 2" (50.8 mm) x 1-1/8" 28.6 mm)
Volts	115
Watts	92
Temperature Range	"Off" to 400°F
Weight	3.46 lbs (1.569 kg)
